Using Research Funding Data to Support and Predict Publishing Activity

Dr. Tom Lickiss
ALPSP 2017
Research Inputs Vs. Research Outputs

- Idea
- Grant Application
- Grant Awarded
- Conference
- Publication
- Citations

1 – 5 years
2 – 3 years
3 - 8 years of relative darkness!
Dimensions

- 3.6 million grants from hundreds of Funders, and growing constantly.
- Over 1.1 Trillion US Dollars in Funding
- Supports searches by keyword, abstract, research category or user-generated category.
- Provides a look into the future of research, and new trends and developments.
Dimensions
Dimensions for Publishers

What is the research activity in our subject at the moment?

Search global research activity and identify the people, research organisations and funders who are the main players in this area.

What are the natural topic branches in this area of research? Is there an area of research which is not currently well served by your journals?

How does that compare to the spread of journals in that area?

How is it changing over time?

What are the growing trends in the research field? And which are in decline? What does this mean for your journal portfolio?
Find Referees Using Either Publications or Grants Information

Identify referees for new manuscripts, and filter by their location or recent activity, as well as identifying conflicts of interest.
The Dimensions Funding Analyzer

A customisable search interface allowing any visitors to your website to search funded research projects in an area of research related to your journal, which you define.
Thank You
